

- Contractors must provide and have on site a minimum of one 10 lb ABC fire extinguisher that is operable and properly serviced. Existing University of Calgary fire extinguishers in the area will not be used for this purpose and must not be removed from their assigned locations.
- All workers must be trained in the proper use of fire extinguishers and how to activate the building fire alarm. All fires must be reported IMMEDIATELY to Campus Security (220-5333).
- Fire resistant tarpaulins may be required to be secured above or below work and all floor and wall openings must be covered when required.
- All flammable and combustible materials within a 15 m radius from the hot work such as flammable liquids, oily rags, dust lint, etc. shall be protected against ignition in conformance with the Alberta Fire Code, or removed from the area.
- Combustible floors must be wetted down and covered with fire resistant tarpaulins.
- Explosive atmospheres must be eliminated prior to starting work.
- Fire Watch must be continually provided during the work and for 60 minutes after work, including any coffee or lunch breaks. Fire Watch may also be required for adjoining areas. Periodic monitoring for an additional 3 hours at the completion of the work may be required depending on the nature of the hot work. This will be stipulated on the permit.
- A final inspection of the hot work area shall be conducted by the responsible supervisor 4 hours after completion of work.
- Completed permits will be kept by the responsible supervisor and will be retained as part of the project documentation records.
